

# Clinical and Experimental Obstetrics & Gynecology

## Contents - Vol. XXIX, 2, 2002

### EDITORIAL ARTICLES

- Impact of laparoscopic surgery on immune function** 77  
Z. Holub - *Cladno, CZECH REPUBLIC*  
Laparoscopic surgery better preserves postoperative immunological function. However, prospective randomized studies are necessary to see whether these potential advantages can be employed in common clinical practice.
- Quantitative study of lymphocytic infiltration of the thyroid gland in the presence or absence of cancer** 82  
N. Papadopoulos - *Alexandroupolis, GREECE*  
In neoplastic conditions of the thyroid gland, the degeneration and necrosis of epithelial cells trigger the activation of immunological mechanisms and subsequent lymphocytic infiltration.

### ORIGINAL ARTICLES

- Evidence that the adverse effect of controlled ovarian hyperstimulation on successful pregnancy outcome following embryo transfer may be related to premature trophoblast invasion** 83  
J. H. Check, P. Nazari, M. L. Check, J. Szekeres-Bartho, W. Yuan - *Pecs, HUNGARY*  
Evidence is presented that one of the reasons for lower pregnancy rates following controlled ovarian hyperstimulation and IVF may be related to premature trophoblast invasion.
- Comparison of the effects of 17 $\alpha$ -ethinylestradiol and 17 $\beta$ -estradiol on the proliferation of human breast cancer cells and human umbilical vein endothelial cells** 87  
C. Lippert, H. Seeger, D. Wallwiener, A. O. Mueck - *Tuebingen, GERMANY*  
17 $\beta$ -estradiol and 17 $\alpha$ -ethinylestradiol exhibit similar cell growth properties in human breast cancer and human vascular endothelial cells.
- Ethnicity and attitude toward menopause and hormone replacement therapy in Northern Israel** 91  
R. Nir-Caein, R. Nahum, Y. Yogev, J. Rosenfeld, M. Fisher, B. Kaplan - *Petah Tiqva, ISRAEL*  
Assessing knowledge, perception and attitude towards menopause and hormone replacement therapy (HRT) among women of different ethnic groups in northern Israel.
- Live birth after posthumous testicular sperm aspiration and intracytoplasmic sperm injection with cryopreserved sperm: case report** 95  
M. L. Check, J. H. Check, D. Summer-Chase, J. K. Choe, D. J. Check, A. Nazari - *New Jersey, USA*  
A successful delivery resulted from in vitro fertilization and intracytoplasmic sperm injection using cryopreserved sperm aspirated from testes post-humously.
- Evaluation of body weight in androgenized female rats** 97  
B. Borges da Silva, J. A. Rocha Gontijo, A. R. Cr  t  , M. de Jesus Sim  es - *S  o Paulo, BRAZIL*  
Androgenized rats present increased body weight and polycystic ovaries, representing an interesting experimental model for research purposes.
- Sexual responses to intrauterine stress: body and brain growth** 100  
V. Dressino, B. Orden, E. E. Oyhenart - *La Plata, ARGENTINA*  
The aims of this work were to analyse body and brain growth and sexual responses to intrauterine stress.
- An XY female with M  llerian duct development and persistent Wolffian duct structures** 103  
I. Ilias, G. K. Kallipolitis, M. Sotiropoulou, Ch. Sofokleous, E. Loukari, A. Souvatzoglou - *Athens, GREECE*  
A case of a phenotypic woman presenting a variant of gonadal dysgenesis, with well-developed m  llerian structures, testicular remnants and a steroid-producing gonadoblastoma is reported.

- Inflammatory response and tissue trauma in laparoscopic hysterectomy: comparison of electrosurgery and harmonic scalpel** 105  
 Z. Holub, A. Jabor, L. Šprongl, L. Kliment, D. Fischlová, Š. Urbánek - *Kladno, CZECH REPUBLIC*  
 The harmonic scalpel and electrosurgery in laparoscopic hysterectomy were equally traumatic in terms of surgical stress response.
- Fertility rate evaluation by a laparoscopic approach in the experimental animal** 110  
 D. Romano, M. G. Terzano, M. Di Domenico, M. S. Ligato, A. Petrone, M. De Santis, A. F. Cavaliere, G. Noia - *Rome, ITALY*  
 This study evaluated the low variation in pregnancy rates of ewes inseminated with semen from different rams.
- A study to determine if embryo cryopreservation influences the potential of rapidly growing embryos to successfully implant in uterine environments not influenced by controlled ovarian hyperstimulation** 113  
 J. H. Check, D. Kiefer, D. Summer-Chase, M. Check, J. K. Choe - *New Jersey, USA*  
 Higher pregnancy rates following transfer of at least one eight-cell embryo are seen with fresh but not frozen embryos.
- Self-health attitudes and practices of obstetrics and gynecology nurses in Israel** 115  
 B. Kaplan, Y. Yogev, M. Fisher, B. Gall, A. Dekel, J. Sulkes, D. Rabinerson - *Tel Aviv, ISRAEL*  
 Obstetrics and gynecology nurses in Israel are aware of the importance of their own health and have good health habits except for cigarette smoking which remains a problem among this group.
- Effects of the association androgen/estrogen on the bladder and urethra of castrated rats** 117  
 A. Madeiro, M. Girão, M. Sartori, E. Acquaroli, E. Baracat, G. Rodrigues De Lima - *São Paulo, BRAZIL*  
 The androgen/estrogen association in castrated rats improves the urinary continence mechanism and could constitute an option for postmenopausal hormone replacement.
- Effects of bilateral uterine vessel ligation on skeletal growth in rats** 121  
 E. E. Oyhenart, L. M. Guimarey, M. C. Fucini, F. A. Quintero, B. Orden - *La Plata, ARGENTINA*  
 The aim of this study was to assess the effects of nutritional rehabilitation on bone growth of intrauterine growth-retarded rats.
- Outcome of anticipated ICSI cycles using intentionally frozen-thawed testicular spermatozoa according to the spouse's response to ovarian stimulation** 126  
 N. Nikolettos, A. Al-Hasani, P. Fornara, I. Vakalopoulos, B. Asimakopoulos, K. Diedrich - *Alexandroupolis, GREECE - Lubeck, GERMANY*  
 It is possible to achieve satisfactory fertilisation rates using frozen-thawed testicular spermatozoa. The limiting factor in reaching implantation and pregnancy is ovarian response to stimulation induction.
- Comparison of poor responders with good responders using intentionally frozen-thawed epididymal spermatozoa in subsequent ICSI cycles** 131  
 N. Nikolettos, A. Al-Hasani, W. Kúpker, I. Vakalopoulos, B. Asimakopoulos, P. Fornara, K. Diedrich - *Alexandroupolis, GREECE - Lubeck, GERMANY*  
 In older women with poor response it is preferable to use frozen-thawed epididymal spermatozoa and to cancel IVF cycles in the hope that a better response might be obtained in a subsequent cycle.
- A quantitative study of collagen production by human smooth muscle cells during intestinal morphogenesis** 135  
 D. Tamiolakis, N. Papadopoulos, A. Hatzimichael, M. Lambropoulou, I. Tolparidou, S. Vavetsis, A. Kotini, F. Anninos, C. Simopoulos - *Thrace, GREECE*  
 Collagen production is upregulated by both smooth muscle cells of the intestinal muscularis externa and mesenchymal cells, especially between 10 to 14 weeks of gestation.
- Sirenomelia in uneventful pregnancy** 140  
 E. Sivridis, A. Giatromanolaki, I. Androulakis, A. Hatzimichael, P. Anastasiadis - *Alexandroupolis, GREECE*  
 A rare case of sirenomelia is presented; it was associated with anorectal atresia, agenesis of the urinary and genital systems, and pulmonary hypoplasia.
- Primary ruptured ovarian pregnancy in a spontaneous conception cycle: a case report and review of the literature** 143  
 M. Varras, D. Polizos, Ch. Kalamara, E. Antypa, A. Tsikini, M. Tsouroulas, S. Antoniou, P. Paissios - *Athens, GREECE*  
 A very rare case of primary ovarian pregnancy in a natural conception cycle is reported; its aetiological, clinical and therapeutic aspects are discussed.
- Neonatal screening for developmental dysplasia of the hip on the maternity wards in Crete, Greece. Correlation to risk factors** 148  
 C. Giannakopoulou, A. Aligizakis, E. Korakaki, E. Velivasakis, E. Hatzidaki, A. Manoura, A. Bakataki, A. Hadjipavlou - *Crete, GREECE*  
 The assessment of value of ultrasound examination in early detection and management of developmental dysplasia of the hip especially in cases with normal clinical examinations and known risk factors.
