CLINICAL AND EXPERIMENTAL OBSTETRICS AND GYNECOLOGY (ISSN 0390-6663) publishes original work, preferably brief reports, in the fields of Gynaecology, Obstetrics, Foetal Medicine, Gynaecological Endocrinology and related subjects. (Fertility and Sterility, Menopause, Uro-gynaecology, Ultrasound in Obstetrics and Gynaecology, Sexually Transmitted Diseases). The Journal is covered by **INDEX MEDICUS, MEDLINE, EMBASE/Excerpta Medica, BIOSIS**.

CLINICAL AND EXPERIMENTAL OBSTETRICS AND GYNAECOLOGY is issued every three months in one volume per year by IROG CANADA Inc. Montréal. Printed in Italy by "La Garangola", Tipografia Editrice - Via Montona 4 - 35137 Padova (Italy).

# Clinical and Experimental Obstetrics and Gynecology

## General Information

CLINICAL AND EXPERIMENTAL OBSTETRICS AND GYNECOLOGY (ISSN 0390-6663) publishes original peer-reviewed work, preferably brief reports, in the fields of Gynecology, Obstetrics, Foetal Medicine, Gynecological Endocrinology, Fertility and Sterility, Menopause, Uro-gynecology, Ultrasound diagnosis in Obstetrics and Gynecology, Sexually transmitted diseases and related topics. It is indexed in INDEX MEDICUS, MEDLINE, EMBASE/Excerpta Medica, BIOSIS.

### AIMS AND SCOPE

Since its inception, the *CLINICAL AND EXPERIMENTAL OBSTETRICS AND GYNECOLOGY Journal* has had the primary aim to assemble and diffuse scientific researches, particularly original researches, contributions, reviews, and proceedings of meetings in every field of the Discipline.

Today its large diffusion all over the world allows us to collect high quality papers and clinical reports on many interesting studies from every country, even from developing countries. This is the target goal of the Journal – aiming at the diffusion of knowledge and advances in female genital diseases.

This publication tries to cover all aspects of obstetrics and gynecology in an interdisciplinary approach among gynecologists, epidemiologists, pathologists, oncologists, radiologists, microbiologists, surgeons, urologists, neonatologists, genetists and so on.

The first target goal of the Journal is to publish **high quality papers** in the **shortest time possible**. Research papers, editorial reviews, case reports, technical notes, book reviews and letters to the Editor are published.

**ANNOUNCEMENTS** regarding meetings, postgraduate courses and symposia will be accepted 6 months before publication and will be published free of charge.

**BOOK SAMPLES** for review should be sent to the Editorial offices in Montréal or in Padova.

**COPYRIGHT:** the Journal has been registered with the Copyright Clearance Center, Inc. Reproductions are not allowed without the written consent of the Publisher. All photocopy fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA stating the ISSN number, the volume and the first and last page numbers of each article copied.

**ADVERTISING INFORMATION:** advertising orders and inquiries may be sent to: I.R.O.G. CANADA Inc., Publisher, 4900 Côte St. Luc, Apt. 212, Montréal (Quebec) Canada H3W 2H3, Tél. 514.4893242-4893640 - Fax 514.4854513 - E-mail: canlux@qc.aira.com - www.irog.net

### SUBSCRIPTION INFORMATION

The Journal is issued every three months (January, April, July and October); one volume per year. Subscriptions start from January and are automatically renewed if not cancelled by the end of September.

Subscriptions include four issues per year plus supplements and monographs and all official communications of Meetings, Courses, Symposia and all scientific activities in the fields of *Obstetrics and Gynecology* and related topics.

**Subscriptions are entered with prepayment only.** The annual subscription is \$280 US for Institutions and \$170 US for Individuals all over the world. For air mail add \$20. Single copies prepaid cost \$75.00 US.

Send subscription requests with cheque or credit card payment (Amex - Visa - Diners - Master Card) to I.R.O.G. CANADA Inc., 4900 Côte St. Luc, Apt. 212, Montréal, Québec H3W 2H3, Canada. **Only US Funds are accepted.**

**Claims** for missing issues can be honoured up to six months. **Changes of address:** allow six weeks for all changes to become effective. All communications should include both old and new addresses (with postal codes) - better if accompanied by a mailing label from a recent issue and should be sent to the printer La Garangola, Via Montona, 4 - 35137 Padova (Italy) - also by Tel. +39.049.8075557, Fax +39.049.7806580. Claims should be made within six months of publication date. Duplicate copies will not be sent to replace those undelivered through failure to notify of change of address.

**Single copies** and back issue and volume information is available from the printer La Garangola, Padua, Tel. +39.049.8075557, Fax +39.049.7806580. Certain back issues may only be available as photocopies of the originals.

All other business correspondence including orders for offprints and advertising space and **any communication and requests should be addressed to** I.R.O.G. CANADA Inc., 4900 Côte St. Luc, Apt. 212, MONTRÉAL, QUÉBEC H3W 2H3 (Canada), Tel. (514) 4893242, fax (514) 4854513.

IN ALL LEGAL MATTERS THE COURT OF MONTREAL IS COMPETENT.

# Clinical and Experimental Obstetrics and Gynecology

## Instructions to Authors

### SUBMISSION OF MANUSCRIPTS

Papers should be submitted to A. ONNIS Editor-in-Chief, 4900 Côte St. Luc, Apt. 212 MONTREAL, QUÉBEC H3W 2H3 (Canada) - Tel. +514-4893242 - Fax +514-4854513 - E-mail: canlux@qc.aira.com, or Galleria Storione 2/A - 35123 PADOVA (Italy) - Tel. +39-049-8756900 - Fax +39-049-8752018.

When a manuscript is submitted, an acknowledgement card is sent to the corresponding author within two or three weeks.

Submitted papers are reviewed by the Editor-in-Chief and his Peer Referees. Authors may be required to modify the manuscript according to the reviewers' suggestions.

**Publication time will be the shortest possible** based on scientific and publishing needs. **Manuscripts submitted for publication cannot be returned.**

Published papers will become property of the Journal and copyrighted under I.R.O.G. CANADA Inc.

All statements are the responsibility of the authors. Product dosages, indications and methods referred to in the papers reflect the operation's experience. No responsibility is assumed by the Editor-in-Chief or the Publisher for any damage from use of any products, operation methods or instructions contained in the published materials.

Trade names, trademarks, etc. are protected by the law and regulations. The Editor-in-Chief and the Publisher cannot accept any legal responsibility for any errors or omissions that may be made in press, particularly for information about drug dosage and application thereof contained in the Journal. Consult the prescribing information before administering any drug.

### MANUSCRIPT REQUIREMENTS

The Journal follows the "Uniform requirements for manuscripts submitted to biomedical journals" published in the *New England Journal of Medicine* 1991, 324, 424-8 and in the *British Medical Journal* 1991, 302.

Three *manuscripts*, typed and double spaced should be submitted **with an electronic disk, formatted in Word for Macintosh or Windows, version 6.0**. A cover letter signed by all authors must state that all authors who have participated in the work take responsibility for the manuscript which they read and approved, and which has never been published or submitted for publication elsewhere. Name, address and phone/fax numbers of the **Corresponding Author**, responsible for revision and approval of the proofs, should be indicated. Full-length **articles** should not exceed 8 printed pages including tables and references.

After the **title page** (full title and names of authors, institutions, eventual acknowledgement for financial support, running title of no more than 60 characters or spaces), original works should be arranged in the conventional order: **Summary** (*purpose of investigation, methods, results, conclusion - about 150 words*), **Key words**, **Content** (a 20-word summary), **Introduction, Materials and Methods, Results, Discussion, Conclusion, Acknowledgement** (if any), **References, Tables, Legends**.

In the text only standard abbreviations can be used and must be avoided in the title. The full term for which an abbreviation stands should precede its first use in the summary and text unless it is a standard unit of measurement.

**Authors** must give their complete professional identifications and affiliations, including all academic titles and positions.

In general, **no more than six authors is considered appropriate**. Authors' names cannot be changed after submission.

**Letters to the editor** should be brief (500 words or less) and offer objective, constructive and educational criticism of published material. The editor reserves the right to publish.

**Figures**: Two original copies (not negatives) of each figure are requested. Each figure should have a label on the back indicating its number, author's name and top of the figure. Do not write on the back of the figures and do not mount them on cardboard. **If sending colour pictures advise if they must be printed in colour or black and white (colour costs ten times more).**

**Legends** should be typed on a separate page with Arabic numerals corresponding to the illustrations.

**Tables** should be titled, typed in double space on separate pages and numbered in Arabic numerals in the order of their first citation in the text. Do not use internal rules. Only standard, universally understood abbreviations should be used.

**References should be numbered consecutively in the order in which they are first mentioned in the text.** Identify references in the text, tables, and legends by Arabic numerals in parentheses.

Use the style of the examples below, which are based with slight modifications on the format used by the U.S. National Library of Medicine in *Index Medicus*. The titles of journals should be abbreviated according to the style used in *Index Medicus*.

References must be verified by the Author(s) against the original documents.

Examples of correct forms of references are given below:

**Articles in Journals**: Authors' surname and initials (if more than six names, give six followed by "et al."), Title, Abbreviated Journal Title, Year of Publication, Volume, Issue, Pages.

**Books**: Authors' surname and initials, title of the book and title of chapter, in: Title, Editor(s), Place, Publisher, Year, Pages.

**Acknowledgments** will be limited to appropriate professionals who were contributors to the paper.

**PROOFS** revised by the editorial staff will be sent to the corresponding author by the publisher and should be checked and returned within 10 days. The corresponding author is responsible for detecting typesetting errors. After this deadline **the proofs will be considered as approved**. Only essential corrections should be made; extensive changes will be charged to the authors.

### BUSINESS MATTERS

The Journal has no commercial advertisements. **Authors will be expected to contribute to the printing expenses, tables, clichés and postage.** For every published article a copy of the Journal will be provided free of charge. **Only payments in US dollars will be accepted.**

**Reprints** should be requested with the form enclosed with the acceptance letter.

No free reprints will be supplied. Authors should supply a complete address for reprint requests.

**Individual subscribers** are entitled to publish works, no longer than two printed pages with 25 reprints, free of charge (excluding tables, figures, illustrations, postage), and to have discounts on additional pages and on reprints over the 25 provided free of charge.

Subscribers will be called on to collaborate in improving the scientific life of the Journal.

**EDITORIAL ARTICLE**

- The shared donor oocyte program: the advantages and insights it provides in determining etiologic factors of infertility** 229  
 J. H. Check - *Camden, N.J., USA*  
 The shared program offers the availability of a larger pool of oocytes reducing waiting times for recipients. The donors are a highly motivated group since they are working for their own infertility problem and are therefore very cooperative.

**ORIGINAL ARTICLES**

- Role of ultrasound evaluation of nuchal translucency in prenatal diagnosis** 235  
 F. Borruto, C. Comparetto, L. Acanfora, G. Bertini, F. F. Rubaltelli - *Verona/Florence, ITALY*  
 Measurement by ultrasound examination of the accumulation of subcutaneous fluid behind the fetal neck, known as "nuchal translucency", at 11-14 weeks of gestation has been associated with maternal age as an effective screening tool for chromosomal abnormalities.
- Nucleated red blood cell counts in growth-restricted neonates with absent or reversed-end-diastolic umbilical artery velocity** 242  
 R. Axt-Flidner, H. J. Hendrik, W. Schmidt - *Homburg/Saar, GERMANY*  
 The nucleated red blood cell count might therefore become an additional valuable tool in the diagnosis of growth restricted fetuses who are metabolically compromised.
- Tension-free vaginal tape procedure for treatment of USI: subjective and objective efficacy evaluation** 247  
 G. Carta, L. Cerrone, P. Iovenitti - *L'Aquila, ITALY*  
 To evaluate objective and subjective efficacy of the TVT procedure in different types of female urinary incontinence.
- Ovine fetal growth curves in twin pregnancy: ultrasonographic assessment** 251  
 G. Noia, D. Romano, G. M. Terzano<sup>1</sup>, M. De Santis, M. Di Domenico, A. Cavaliere, M. S. Ligato, A. Petrone, G. Fortunato, F. Filippetti, A. Caruso, S. Mancuso - *Rome, ITALY*  
 The fetal-lamb model is a fundamental tool for developing clinical applications for the treatment of human fetal pathology. Fetal growth indexes were measured weekly using perimammary and transvaginal ultrasonography.
- The importance of number of blastomeres when embryos are transferred in the absence of controlled ovarian hyperstimulation** 257  
 J. H. Check, D. Summers-Chase, A. Nazari, D. Kiefer, K. Swenson - *New Jersey, USA*  
 Blastomere number was positively associated with pregnancy rate even without ovarian hyperstimulation following fresh but not frozen embryo transfer.
- Can human fetal cortical brain tissue transplant (up to 20 weeks) sustain its metabolic and oxygen requirements in a heterotopic site outside the brain? A study of 12 volunteers with Parkinson's disease** 259  
 N. Bhattacharya, M. K. Chhetri, K. L. Mukherjee, A. Baran Ghosh, B. Krishna Samanta, R. Mitra, M. Bhattacharya, S. Bhattacharya, T. Bandopadhyaya - *Calcutta, INDIA*  
 Human fetal cortical brain tissue can grow and proliferate in sex/HLA randomized adult axilla without immunosuppressive support.
- Tromboprophylaxis throughout pregnancy in women with previous history of recurrent miscarriages of unknown aetiology** 267  
 J. Tzafettas, A. Mamopoulos, A. Anapliotis, A. Loufopoulos, A. Psarra, N. Klearchou, M. Mamopoulos - *Thessaloniki, GREECE*  
 The efficacy of low molecular weight heparin and low-dose aspirin throughout pregnancy in women with previous history of recurrent miscarriages.
- Reproductive outcome after laparoscopic treatment of endometriosis** 271  
 M. G. Porpora, D. C. Pultrone, M. Bellavia, C. Franco, M. Crobu, E. V. Cosmi - *Rome, ITALY*  
 Laparoscopic treatment enhances fertility in women with endometriosis; the pregnancy rate is highest in the first six months after surgery.
- The efficacy of immediate post-abortion intrauterine device insertion** 274  
 A. Göçmen, N. Demirpolat, H. Aysin - *Kayseri, TURKEY*  
 Immediate post-abortion intrauterine device insertion is safe and could be offered to those who have had an abortion and who ask for a method of contraception.
- Laparoscopic-ultraminilaparotomic myomectomy (LUM) - laparoscopic-ultraminilaparotomic embolized myomectomy (LUEM). Surgical techniques** 277  
 P. G. Signorile - *Rome, ITALY*  
 Laparoscopic-ultraminilaparotomic myomectomy (LUM) and laparoscopic-ultraminilaparotomic embolized myomectomy (LUEM) are new treatments for surgery of large myomas. This technique has a new solution for uterine sutures and for hemostasis during a laparoscopic procedure.

	227
<b>Should asymptomatic bacteriuria be screened in pregnancy?</b>	281
Y. Uncu, G. Uncu, A. Esmer, N. Bilgel - <i>Uludag, TURKEY</i> Considering the relatively high incidence of asymptomatic bacteriuria during pregnancy, asymptomatic bacteriuria should be screened and treated routinely in all pregnant women.	
<b>A comparative study of the effect of ovarian stimulation protocols with different gonadotropin preparations on the biological and clinical parameters of the outcome of intracytoplasmic sperm injection</b>	286
P. Drakakis, D. Loutradis, K. Kallianidis, R. Bletsas, S. Milingos, A. Dionyssiou-Asteriou, S. Michalakis - <i>Athens, GREECE</i> The effect of ovarian stimulation with different gonadotropins on the outcome of intracytoplasmic sperm injection is reported.	
<b>CASE REPORTS</b>	
<b>Endometrial fluid accumulation during controlled ovarian stimulation for ICSI treatment. A report of three cases</b>	290
N. Nikolettos, B. Asimakopoulos, I. Vakalopoulos, M. Simopoulou - <i>Alexandroupolis, GREECE</i> Three cases with endometrial fluid accumulation during controlled ovarian stimulation are presented.	
<b>Serous papillary cystic ovarian borderline tumor: case report</b>	293
R. Idotta, P. Scopelliti, C. Polimeni, M. F. Lirosi - <i>Reggio Calabria, ITALY</i> A case of a 30-year-old patient with a serous papillary borderline tumor of the right ovary who underwent a simple mono-lateral salpingo-oophorectomy is presented. Conservative surgery allowed a subsequent pregnancy with spontaneous delivery 27 months later.	
<b>Complementary therapy for severe Rh-alloimmunization</b>	297
G. M. Noia, M. De Santis, D. Romano, A. F. Cavaliere, M. S. Ligato, A. Petrone, G. Fortunato, F. Filippetti, A. Caruso, S. Mancuso - <i>Rome, ITALY</i> Successful treatment, using invasive and noninvasive techniques, of a 36-year-old woman (gravida 10, para 0) is reported. Pre-pregnancy indirect Coombs titers ranged from 1:1024-2048.	
<b>Two consecutive ectopic pregnancies after in-vitro fertilization and embryo transfer: Case report</b>	302
A. Abu-Musa, A. Nassar, K. Sakhel, I. Usta - <i>Beirut, LEBANON</i> A case of a patient with two consecutive ectopic pregnancies after IVF/ET is reported. Tubal pathology seems to be the main risk factor.	
<b>Successful treatment with carbimazole of a hyperthyroid pregnancy with hepatic impairment after propylthiouracil administration: a case report</b>	304
P. Kontoleon, I. Ilias, D. A. Koutras, D. Kontogiannis, P. D. Papapetrou - <i>Athens, GREECE</i> Successful alternative treatment of hyperthyroidism with carbimazole in a 27-year-old pregnant woman after hepatic impairment with propylthiouracil administration.
