CLINICAL AND EXPERIMENTAL OBSTETRICS AND GYNECOLOGY (ISSN 0390-6663) publishes original work, preferably brief reports, in the fields of Gynaecology, Obstetrics, Foetal Medicine, Gynaecological Endocrinology and related subjects. (Fertility and Sterility, Menopause, Uro-gynaecology, Ultrasound in Obstetrics and Gynaecology, Sexually Transmitted Diseases). The Journal is covered by **INDEX MEDICUS, MEDLINE, EMBASE/Excerpta Medica, BIOSIS.**

CLINICAL AND EXPERIMENTAL OBSTETRICS AND GYNAECOLOGY is issued every three months in one volume per year by IROG CANADA Inc. Montréal. Printed in Italy by "La Garangola", Tipografia Editrice - Via E. Dalla Costa, 6 - 35129 Padova (Italy).

# Clinical and Experimental Obstetrics and Gynecology

## General Information

CLINICAL AND EXPERIMENTAL OBSTETRICS AND GYNECOLOGY (ISSN 0390-6663) publishes original peer-reviewed work, preferably brief reports, in the fields of Gynecology, Obstetrics, Foetal Medicine, Gynecological Endocrinology, Fertility and Sterility, Menopause, Uro-gynecology, Ultrasound diagnosis in Obstetrics and Gynecology, Sexually transmitted diseases and related topics. It is indexed in INDEX MEDICUS, MEDLINE, EMBASE/Excerpta Medica, BIOSIS.

### AIMS AND SCOPE

Since its inception, the *CLINICAL AND EXPERIMENTAL OBSTETRICS AND GYNECOLOGY Journal* has had the primary aim to assemble and diffuse scientific researches, particularly original researches, contributions, reviews, and proceedings of meetings in every field of the Discipline.

Today its large diffusion all over the world allows us to collect high quality papers and clinical reports on many interesting studies from every country, even from developing countries. This is the target goal of the Journal – aiming at the diffusion of knowledge and advances in female genital diseases.

This publication tries to cover all aspects of obstetrics and gynecology in an interdisciplinary approach among gynecologists, epidemiologists, pathologists, oncologists, radiologists, microbiologists, surgeons, urologists, neonatologists, genetists and so on.

The first target goal of the Journal is to publish **high quality papers** in the **shortest time possible**. Research papers, editorial reviews, case reports, technical notes, book reviews and letters to the Editor are published.

**ANNOUNCEMENTS** regarding meetings, postgraduate courses and symposia will be accepted 6 months before publication and will be published free of charge.

**BOOK SAMPLES** for review should be sent to the Editorial offices in Montréal or in Padova.

**COPYRIGHT:** the Journal has been registered with the Copyright Clearance Center, Inc. Reproductions are not allowed without the written consent of the Publisher. All photocopy fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA stating the ISSN number, the volume and the first and last page numbers of each article copied.

**ADVERTISING INFORMATION:** advertising orders and inquiries may be sent to: I.R.O.G. CANADA Inc., Publisher, 4900 Côte St. Luc, Apt. 212, Montréal (Quebec) Canada H3W 2H3, Tél. 514.4893242-4893640 - Fax 514.4854513 - E-mail: canlux@qc.aira.com - www.irog.net

**RESPONSABILITY:** although every effort is made by the editorial staff and the printer to eliminate misleading or inaccurate information, the publisher accepts no responsibility for the consequences of faulty or incorrect information. The authors recognize that the editor and publisher have no responsibility and are indemnified against any liability or claim that may result from the publication of misleading or incorrect data.

### SUBSCRIPTION INFORMATION

The Journal is issued every three months (January, April, July and October); one volume per year. Subscriptions start from January and are automatically renewed if not cancelled by the end of September.

Subscriptions include four issues per year plus supplements and monographs and all official communications of Meetings, Courses, Symposia and all scientific activities in the fields of *Obstetrics and Gynecology* and related topics.

**Subscriptions are entered with prepayment only.** The annual subscription is \$280 US for Institutions and \$170 US for Individuals all over the world. For air mail add \$20. Single copies prepaid cost \$75.00 US.

Send subscription requests with cheque or credit card payment (Amex - Visa - Diners - Master Card) to I.R.O.G. CANADA Inc., 4900 Côte St. Luc, Apt. 212, Montréal, Québec H3W 2H3, Canada. **Only US Funds are accepted.**

**Claims** for missing issues can be honoured up to six months. **Changes of address:** allow six weeks for all changes to become effective. All communications should include both old and new addresses (with postal codes) - better if accompanied by a mailing label from a recent issue and should be sent to the printer La Garangola, Via E. Dalla Costa, 6 - 35129 Padova (Italy) - also by Tel. +39.049.8075557, Fax +39.049.7806580. Claims should be made within six months of publication date. Duplicate copies will not be sent to replace those undelivered through failure to notify of change of address.

**Single copies** and back issue and volume information is available from the printer La Garangola, Padua, Tel. +39.049.8075557, Fax +39.049.7806580. Certain back issues may only be available as photocopies of the originals.

All other business correspondence including orders for offprints and advertising space and **any communication and requests should be addressed to** I.R.O.G. CANADA Inc., 4900 Côte St. Luc, Apt. 212, MONTRÉAL, QUÉBEC H3W 2H3 (Canada), Tel. (514) 4893242, fax (514) 4854513.

IN ALL LEGAL MATTERS THE COURT OF MONTREAL IS COMPETENT.

# Clinical and Experimental Obstetrics and Gynecology

## Instructions to Authors

### SUBMISSION OF MANUSCRIPTS

Papers should be submitted to A. ONNIS Editor-in-Chief, 4900 Côte St. Luc, Apt. 212 MONTREAL, QUÉBEC H3W 2H3 (Canada) - Tel. +514-4893242 - Fax +514-4854513 - E-mail: canlux@qc.aira.com, or Galleria Storione 2/A - 35123 PADOVA (Italy) - Tel. +39-049-8756900 - Fax +39-049-8752018.

When a manuscript is submitted, an acknowledgement card is sent to the corresponding author within two or three weeks.

Submitted papers are reviewed by the Editor-in-Chief and his Peer Referees. Authors may be required to modify the manuscript according to the reviewers' suggestions.

Manuscripts accepted for publication will be copyedited by the editorial staff for typographical and grammatical mistakes and to guarantee clarity and conciseness.

**Publication time will be the shortest possible** based on scientific and publishing needs. **Manuscripts submitted for publication cannot be returned.**

Published papers will become property of the Journal and copyrighted under I.R.O.G. CANADA Inc.

After six months no grievances will be accepted regarding published articles.

All statements are the responsibility of the authors. Product dosages, indications and methods referred to in the papers reflect the author's experience. No responsibility is assumed by the Editor-in-Chief or the Publisher for any damage from use of any products, operation methods or instructions contained in the published materials.

Trade names, trademarks, etc. are protected by the law and regulations. The Editor-in-Chief and the Publisher cannot accept any legal responsibility for any errors or omissions that may be made in press, particularly for information about drug dosage and application thereof contained in the Journal. Consult the prescribing information before administering any drug.

### MANUSCRIPT REQUIREMENTS

The Journal follows the "Uniform requirements for manuscripts submitted to biomedical journals" published in the *New England Journal of Medicine* 1991, 324, 424-8 and in the *British Medical Journal* 1991, 302.

Three *manuscripts*, typed and double spaced should be submitted **with an electronic disk, formatted in Word for Macintosh or Windows, version 6.0.** Manuscripts without an electronic disk will not be accepted. A cover letter signed by all authors must state that all authors who have participated in the work take responsibility for the manuscript which they read and approved, and which has never been published or submitted for publication elsewhere. Name, address and phone/fax numbers of the *Corresponding Author*, responsible for revision and approval of the proofs, should be indicated. Full-length *articles* should not exceed 8 printed pages including tables and references.

After the *title page* (full title and names of authors, institutions, eventual acknowledgement for financial support, running title of no more than 60 characters or spaces), original works should be arranged in the conventional order: *Summary* (purpose of investigation, methods, results, conclusion - about 150 words), *Key words*, *Content* (a 20-word summary), *Introduction*, *Materials and Methods*, *Results*, *Discussion*, *Conclusion*, *Acknowledgement* (if any), *References*, *Tables*, *Legends*.

In the text only standard abbreviations can be used and must be avoided in the title. The full term for which an abbreviation stands should precede its first use in the summary and text unless it is a standard unit of measurement.

*Authors* must give their complete professional identifications and affiliations, including all academic titles and positions.

In general, **no more than six authors is considered appropriate.** Authors' names cannot be changed after submission.

*Letters to the editor* should be brief (500 words or less) and offer objective, constructive and educational criticism of published material. The editor reserves the right to publish.

*Figures:* Two original copies (not negatives) of each figure are requested. Each figure should have a label on the back indicating its number, author's name and top of the figure. Do not write on the back of the figures and do not mount them on cardboard. **If sending colour pictures advise if they must be printed in colour or black and white (colour costs ten times more).**

*Legends* should be typed on a separate page with Arabic numerals corresponding to the illustrations.

*Tables* should be titled, typed in double space on separate pages and numbered in Arabic numerals in the order of their first citation in the text. Do not use internal rules. Only standard, universally understood abbreviations should be used.

*References should be numbered consecutively in the order in which they are first mentioned in the text.* Identify references in the text, tables, and legends by Arabic numerals in parentheses.

Use the style of the examples below, which are based with slight modifications on the format used by the U.S. National Library of Medicine in *Index Medicus*. The titles of journals should be abbreviated according to the style used in *Index Medicus*.

References must be verified by the Author(s) against the original documents.

Examples of correct forms of references are given below:

*Articles in Journals:* Authors' surname and initials (if more than six names, give six followed by "et al."), Title, Abbreviated Journal Title, Year of Publication, Volume, Issue, Pages.

*Books:* Authors' surname and initials, title of the book and title of chapter, in: Title, Editor(s), Place, Publisher, Year, Pages.

*Acknowledgments* will be limited to appropriate professionals who were contributors to the paper.

**PROOFS** revised by the editorial staff will be sent to the corresponding author and should be checked and returned within 10 days. The corresponding author is responsible for detecting typesetting errors. After this deadline **the proofs will be considered as approved.** Only essential corrections should be made; extensive changes will be charged to the authors.

### BUSINESS MATTERS

The Journal has no commercial advertisements. **Authors will be expected to contribute to the printing expenses, tables, clichés and postage.** For every published article a copy of the Journal will be provided free of charge. **Only payments in US dollars will be accepted.**

*Reprints* should be requested with the form enclosed with the acceptance letter.

No free reprints will be supplied. Authors should supply a complete address for reprint requests.

**Individual subscribers** are entitled to publish, once a year, works, no longer than two printed pages with 25 reprints, free of charge (excluding tables, figures, illustrations, postage), and to have discounts on additional pages and on reprints over the 25 provided free of charge. When the work is sent the Author needs to specify that he is a subscriber.

Subscribers will be called on to collaborate in improving the scientific life of the Journal.

## EDITORIAL ARTICLES

- Cytodiagnosis in cervical neoplasia: from the Babes/Papanicolaou smear to the actual Bethesda System** 173  
 P. Virtej, C. Vasiliu - *Bucharest, ROMANIA*  
 The cervico-vaginal smear is a method of early detection of cytologic abnormalities that has been used for over 70 years and has continuously improved.
- Actual trends in screening, diagnosis and prognosis of endometrial cancer** 178  
 St. Chiovschi, M. Moldovan, I. T. Cioată - *Timișoara, ROMANIA*  
 Knowledge of the two main forms of endometrial carcinoma with different etiology, evolution, and characteristics allows a better management.
- Uterine cervical elongation and prolapse during pregnancy: An old unsolved problem** 183  
 Y. Yogev, E. R. Horowitz, A. Ben-Haroush, B. Kaplan - *Tel Aviv, ISRAEL*  
 Uterine cervical elongation and prolapse during pregnancy; pathogenesis, etiology and management of this relatively rare but complicated disorder.

## REVIEW ARTICLE

- Could the theory of chaos contribute to the interpretation of pathogenesis of polycystic ovary syndrome?** 187  
 D. K. Panidis, D. H. Rousso, A. I. Kourtis, K. V. Papatthanasiou - *Thessaloniki, GREECE*  
 The theory of chaos may constitute an optional procedure for the understanding of the association of different parameters and their disturbances in the pathogenesis of PCOS.

## ORIGINAL ARTICLES

- Three-dimensional sonography and hysterosalpingosonography in the diagnosis of uterine anomalies** 190  
 R. La Torre, R. Prospero Porta, C. Franco, M. Sansone, M. Mazzocco, I. Pergolini, C. De Felice, E. V. Cosmi - *Rome, ITALY*  
 To evaluate the role of 2D TV contrast sonography, 3D TV ultrasound and hysterosalpingosonography in the diagnosis of congenital uterine anomalies.
- Slow rising serial chorionic gonadotropins predict poor pregnancy outcome despite sonographic viability** 193  
 J. H. Check, J. R. Liss, Y. Katz, K. Shucoski - *Camden, NJ (USA)*  
 Women demonstrating fetal viability at eight week's gestation should not expect an optimistic prognosis if beta hCG levels are slow rising.
- Effect of short follicular phase with follicular maturity on conception outcome** 195  
 J. H. Check, J. R. Liss, K. Shucoski, M. L. Check - *Camden, NJ (USA)*  
 Ovulation before day 11 decreases fecundity despite follicular maturation. Extending the follicular phase with estrogen restores fertility potential.
- Effect of transferring frozen-thawed embryos resulting from fertilization of immature oocytes matured one day in culture prior to intracytoplasmic sperm injection (ICSI) on implantation rates** 197  
 J. H. Check, K. Swenson, D. Summers-Chase, J. K. Choe, W. Yuan - *Camden, NJ (USA)*  
 Frozen-thawed embryos derived from fertilization of immature oocytes have fair implantation but higher miscarriage rates compared to deselected embryos.
- Efficacy of sharing oocytes from compensated donors between two recipients** 199  
 J. H. Check, F. Fox, D. Deperro, E. Davies, J. W. Krotec - *Camden, NJ (USA)*  
 The sharing of oocytes between recipients does not lower success following embryo transfer but decreases the number of frozen embryos remaining.
- An evaluation of the efficacy of using oocyte donors aged 36-39** 201  
 J. H. Check, F. Fox, J. W. Krotec, E. Davies, D. Deperro - *Camden, NJ (USA)*  
 Pregnancy and implantation rates were similar for recipients receiving oocytes from donors aged 36-39 as with younger donors.

<b>The immediate effect of natural plant extract, <i>Angelica Sinensis</i> and <i>Matricaria Chamomilla</i> (Climex) for the treatment of hot flushes during menopause. A preliminary report</b>	203
C. Kupfersztain, C. Rotem, R. Fagot, B. Kaplan - <i>Tel Aviv, ISRAEL</i>	
Supplementation with botanicals (climex) is an effective alternative for immediate symptomatic relief of vasomotor symptoms in postmenopausal women.	
<b>Serum leptin levels in normal-weight and overweight women with polycystic ovary syndrome</b>	207
D. Panidis, D. Rousso, A. Kourtis, V. Tsimas, K. Papatthanasidou, G. Makedos - <i>Thessaloniki, GREECE</i>	
Serum leptin levels in a subgroup of overweight women with PCOS and insulin resistance were higher than those expected for their BMI, and therefore leptin might interfere in the pathogenesis of PCOS.	
<b>Fetomaternal Doppler sonography nomograms</b>	211
A. K. Ertan, H. J. Hendrik, H. A. Tanriverdi, M. Bechtold, W. Schmidt - <i>Homburg/Saar, Heidelberg, GERMANY and Kozlu-Zonguldak, TURKEY</i>	
This study demonstrates fetomaternal Doppler sonographic nomograms for clinical practice and gives information about the development of Doppler velocimetric changes in pregnancy.	
<b>Preoperative evaluation of ovarian masses: ultrasound and biochemical screening</b>	217
M. G. Piccioni, C. Fabiani, V. Fattouche, S. Furano, J. Melluso, V. Sabelli - <i>Rome, ITALY</i>	
The preoperative study of an ovarian mass, with a negative dosage of plasmatic BhCG, mainly has the purpose of discriminating between a benign neoplastic mass and a malignant mass. This work evaluates the validity of preoperative screening of adnexal masses including pelvic ultrasound examination, and the dosage of some plasmatic tumor markers.	
<b>Clinical and urodynamic evaluation of women with detrusor instability before and after functional pelvic floor electrostimulation</b>	220
R. M. Arruda, R. A. Castro, M. G. F. Sartori, C. C. Takano, E. C. Baracat, G. Rodrigues de Lima, M. J. B. C. Girão - <i>São Paulo, BRAZIL</i>	
Clinical and urodynamic improvements were observed after vaginal electrostimulation in 29 women with detrusor instability, using equipment designed at our institution.	
<b>Accuracy of office hysteroscopy in the diagnosis of endometrial hyperplasia</b>	223
C. Vasile, M. Piazza - <i>Padua, ITALY</i>	
In the last decade the advantages of office hysteroscopy performed without cervical dilatation and/or anaesthesia were fully demonstrated. Office hysteroscopy is the gold standard diagnostic method in the diagnosis of intrauterine pathology, with high accuracy and compliance.	
<b>Father-to-son sperm donation. A report of three cases</b>	226
N. Nikolettos, B. Asimakopoulos, I. Vakalopoulos, M. Orologa, I. Hatzissabas - <i>Alexandroupolis, GREECE</i>	
Three cases of ICSI performed with father-to-son sperm donation are presented and the ethical and emotional implications are discussed.	
<b>Action of 25 µg 17β-oestradiol vaginal tablets in the treatment of vaginal atrophy in Greek postmenopausal women; clinical study</b>	229
Ch. Akrivis, M. Varras, A. Thodos, G. Hadjopoulos, A. Bellou, N. Antoniou - <i>Corfu, GREECE</i>	
The clinical efficacy and safety of intravaginal application of 25 µg micronized oestradiol in postmenopausal women from the Greek population suffering from symptoms related to vaginal atrophy were investigated.	
<b>Recombinant human erythropoietin in mildly anemic women before total hysterectomy</b>	235
V. Dousias, E. Paraskevaïdis, N. Dalkalitsis, G. Tsanadis, I. Navrozoglou, D. Lolis - <i>Ioannina, GREECE</i>	
Preoperative management with recombinant human erythropoietin in women undergoing total hysterectomy induces a rapid and persistent increase in mean hemoglobin level.	
<b>Preliminary results of orthotopic en bloc uterus and ovary transplantation in the laboratory rat</b>	239
A. Motoc, L. Jiga, M. Ionac, M. Raica, M. Motoc, S. Chiovschi - <i>Timișoara, ROMANIA</i>	
A new experimental model of whole uterus and ovaries transplantation in the laboratory rat was achieved. The main goals of this study were concerned with developing and standardizing the microsurgical technique of uterus transplantation in rats and observing the particular cellular patterns of the acute allograft rejection at the level of the transplanted graft.	
<b>Peripartum cardiomyopathy: characteristics and outcome in a tertiary care hospital</b>	243
G. V. Moukarbel, M. S. A. Arnaout - <i>Beirut, LEBANON</i>	
This study is a retrospective analysis of the acute and long-term outcomes in patients with peripartum cardiomyopathy.	

**Evaluation during early puerperium of the low transverse incision after cesarean section through vaginal ultrasonography** 245

Ger. Koutsougeras, D. Karamanidis, G. Chimonis, N. Gottas, A. Polydorou, Ch. Elmazis, B. Chatzidis - *Alexandroupolis, GREECE*  
 Vaginal sonography can identify the normal postoperative changes of the incision site as an oval region between the bladder and the uterus.

**CASE REPORT**

**Mucinous cystadenoma of the ovary with functioning stroma and virilization in pregnancy: A case report and review of the literature** 248

N. Antoniou, M. Varras, Ch. Akrivis, A. Demou, A. Bellou, S. Stefanaki - *Ioannina, GREECE*  
 In this study the authors present the extremely rare case of clinical virilization during pregnancy associated with an ovarian mucinous cystadenoma with functioning stroma. The relevant literature is also reviewed.

**A voluminous twisted paraovarian cyst in a 74-year-old patient: case report and review of the literature** 253

M. Varras, Ch. Akrivis, D. Polyzos, S. Frakala, Ch. Samara - *Athens, GREECE*  
 A very rare case of a 74-year-old patient who suffered from a twisted voluminous right paraovarian cyst is reported. The problems these large masses may cause patients are also discussed.

**Triplet pregnancy after oocyte donation in women 46 years of age and older: Three case reports** 257

E. Makrakis, M. Grammatidis, N. Vitoratos, D. Stavrou, P. Karantzis, K. Pantos - *Athens, GREECE*  
 Rare cases of triplet pregnancies in advanced maternal age achieved with oocyte donation were delivered successfully.

**Prenatal diagnosis of congenital cystic adenomatoid lung malformation: A case report and review of the literature** 259

Ch. Akrivis, M. Varras, A. Demou, A. Bellou, S. Stefanaki, N. Antoniou - *Epirus, GREECE*  
 A rare case of congenital cystic adenomatoid malformation of the fetal lung (type II) is presented and its ultrasonographic and pathologic findings are discussed. The international literature is reviewed.

**Successful pregnancy in a woman with rare compound heterozygosity for congenital adrenal hyperplasia; a case report** 263

P. Kontoleon, I. Ilias, P. D. Papapetrou - *Athens, GREECE*  
 A case of pregnancy in a patient with congenital adrenal hyperplasia due to a combination of mutations in the 21-hydroxylase gene is reported.

**SHORT COMMUNICATION**

**The utility of routine breast ultrasound screening in Gynecology** 265

M. Gojnic, S. Petkovic, M. Pervulov, J. Micic - *Belgrade, YUGOSLAVIA*  
 Routine ultrasonography of the breast should be included in every gynecologic examination even in a low-risk patients.
