CLINICAL AND EXPERIMENTAL OBSTETRICS AND GYNECOLOGY (ISSN 0390-6663) publishes original work, preferably brief reports, in the fields of Gynecology, Obstetrics, Fetal Medicine, Gynecological Endocrinology and related subjects. (Fertility and Sterility, Menopause, Uro-gynecology, Ultrasound in Obstetrics and Gynecology, Sexually Transmitted Diseases, Reproductive Biological Section). The Journal is covered by **INDEX MEDICUS, MEDLINE, EMBASE/Excerpta Medica**.

CLINICAL AND EXPERIMENTAL OBSTETRICS AND GYNECOLOGY is issued every three months in one volume per year by IROG CANADA Inc. Montréal. Printed in Italy by "La Garangola", Tipografia Editrice - Via E. Dalla Costa, 6 - 35129 Padova (Italy).

## EDITORIAL ARTICLES

- Advances in oocyte cryopreservation - Part II: rapid cooling using vitrification** 5  
 J.H. Check - *Camden, NJ (USA)*  
 Recent modifications have now allowed a previous toxic cryopreservation technique to be very successful for freezing not only embryos but even oocytes.
- Sex steroidal modulation of collagen metabolism in uterine leiomyomas** 10  
 N. Ohara - *Kobe, JAPAN*  
 Uterine leiomyomas contain abundant collagen deposition. Sex steroidal modulation of collagen synthesis in uterine leiomyomas is described.

## ORIGINAL ARTICLES

### *Reproductive Biology Section*

- Three successful pregnancies following natural conception over an 8-year time span despite serum follicle stimulating hormone level greater than 15 mIU/ml** 12  
 J.H. Check, J. Giangreco - *Camden, NJ (USA)*  
 A case is described of a woman who despite a serum FSH > 15 mIU/ml achieved three successful pregnancies with natural conception unaided by any follicle maturing drugs over an 8-year time period.
- Septoplasty allows successful delivery in a primary aborter with six previous first trimester miscarriages** 15  
 J.K. Choe, J.H. Check, R. Chern - *Camden, NJ (USA)*  
 A case is presented that provides clear cut evidence that a uterine septum can be the cause of recurrent miscarriage and that septoplasty improves the odds of success.

### *General Section*

- Pregnancy outcome after treatment of cervical intraepithelial neoplasia by the loop electrosurgical excision procedure and cold knife conization** 17  
 M.A. Michelin, L.M. Merino, C.A. Franco, E.F.C. Murta - *Uberaba, MG (BRAZIL)*  
 For patients with CIN who desire pregnancy, LEEP should be the procedure of choice.
- The possible influence of increased body mass index on the clinical efficacy of standard human chorionic gonadotropin dosage** 20  
 J. Ashkenazi, I. Bar-Hava, S. Meltcer, J. Rabinson, E.Y. Anteby, R. Orvieto - *Tel Aviv, ISRAEL*  
 Standard (10,000 IU) hCG dosage is adequate to induce final oocyte maturation in IVF patients regardless of their BMI.
- Serological testing for celiac disease in women with endometriosis. A pilot study** 23  
 F.M. Aguiar, S.B. Castanheira Melo, L. Carvalho Galvão, J.C. Rosa-e-Silva, R.M. dos Reis, R.A. Ferriani - *São Paulo, SP, BRAZIL*  
 The prevalence of celiac disease among women with endometriosis is reported. It is a common disease in this population and may be clinically relevant.
- Microcolposcopy in the diagnostic evaluation of abnormal cervical cytology: when and why to do it** 26  
 A. Lukic, S. Iannaccio, M. Di Properzio, E. Carico, A. Camboni, A. Vecchione, M. Moscarini - *Naples, ITALY*  
 The assessment of diagnostic reliability of microcolposcopy is evaluated in relation to colposcopy, cytology and histology.
- The accuracy of frozen section analysis at hysterectomy in patients with atypical endometrial hyperplasia** 31  
 M.C. Salman, A. Usubutun, N.U. Dogan, K. Yuce - *Ankara, TURKEY*  
 Frozen section analysis is necessary to determine the presence of cancer and need for surgical staging in atypical endometrial hyperplasia.

<b>Transvaginal sonography of cervical length and Bishop score as predictors of successful induction of term labor: the effect of parity</b>	35
P.C. Tan, N. Vallikkannu, S. Suguna, K.F. Quek, J. Hassan - <i>Kuala Lumpur, MALAYSIA</i> Transvaginal ultrasound of a long cervix is a useful predictor for failed labor induction in nulliparas but not in multiparas.	
<b>Integrating cervical length measurement into routine antenatal screening and only emergency cerclage when indicated</b>	40
E. Caliskan, Y. Cakiroglu, D. Dundar, E. Doger, S. Caliskan, S. Ozeren - <i>Kocaeli, TURKEY</i> Cervical length measurement can be assessed not only for pregnant women having risk factors for preterm labor, but also for every pregnant woman.	
<b>CASE REPORTS</b>	
<b>Complete remission of OC-resistant catamenial shoulder joint pain and inguinal pain associated with extraperitoneal endometriosis following personalized GnRH agonist therapy</b>	46
T. Tanaka, N. Umesaki - <i>Wakayama, JAPAN</i> Complete remission of OC-resistant catamenial shoulder joint pain and inguinal pain associated with extraperitoneal endometriosis was achieved by personalized GnRH therapy.	
<b>Near lethal endometriosis and a massive (64 kg) endometrioma: case report and review of the literature</b>	49
S.V. Sakpal, C. Patel, R.S. Chamberlain - <i>Livingston, NJ, USA</i> A morbidly obese female with severe endometriosis and a massive endometrioma (64 kg) - presentation, diagnosis and treatment.	
<b>The development of placenta increta following pelvic transcatheter artery embolization for postpartum hemorrhage</b>	53
K. Kitao, N. Makihara, H. Morita, M. Yamasaki, S. Matsuoka, N. Ohara, T. Maruo - <i>Kobe, JAPAN</i> A case of placenta increta in a pregnant woman undergoing pelvic transcatheter artery embolization for postpartum hemorrhage is reported.	
<b>Pregnancy-induced symptomatic pelvic and extra-pelvic cavernous hemangiomas</b>	55
M. Guida, D. Paladini, E. Greco, A. Di Spiezio Sardo, C. Coppola, C. Nappi - <i>Naples, ITALY</i> The ultrasound features and clinical management of symptomatic pelvic and extra-pelvic cavernous hemangiomas in a pregnant woman are described.	
<b>Serous cystadenoma with massive ovarian edema. A case report and review of the literature</b>	58
S. Diamantopoulou, K. Sikiotis, J. Panayiotides, D. Kassanos - <i>Athens, GREECE</i> The case of a 13-year-old female with massive ovarian edema associated with serous cystadenoma is presented together with treatment, radiologic and pathologic findings, and review of the literature.	
<b>Acute urinary retention due to a uterine fibroid in a non-pregnant woman</b>	62
G. Mavromatidis, K. Dinas, A. Mamopoulos, D. Delkos, D. Rousso - <i>Thessaloniki, GREECE</i> A case of a non-pregnant woman who presented with acute urinary retention due to a uterine fibroid is presented.	
<b>Book Review</b>	64
