EUROPEAN JOURNAL OF GYNAECOLOGICAL ONCOLOGY (ISSN 0392-2936) publishes original peer reviewed works in the fields of female genital cancers and related subjects and also proceedings of gynecologic oncology society meetings all over the world. The Journal is covered by **CURRENT CONTENTS, SCISEARCH, RESEARCH ALERT, INDEX MEDICUS, MEDLINE, EMBASE/Excerpta Medica, CURRENT ADVANCES IN CANCER RESEARCH, BIOSIS.**

**DISTINGUISHED EXPERT SERIES**

- Adjuvant radiotherapy in Stage I endometrial cancer. Where do we stand?** 457  
 C. Petnehazi, P. Thirion, J. Armstrong - *Dublin, IRELAND*  
 The anatomical patterns of spread and failure patterns of surgical Stage I endometrial cancer are reviewed. The controversial aspects of the optimal adjuvant treatment are presented. An attempt is made to identify the most effective management approach based on pertinent literature data.
- BRCA susceptibility genes - A Review of current conservative management of BRCA mutation carriers** 463  
 H. Levavi, G. Sabah - *Petah Tiqva and Ramat Aviv, ISRAEL*  
 Review of the current surveillance and chemoprevention managements and recommendations available for women carrying deleterious BRCA gene mutations.

**PROCEEDINGS OF EXPERTS WORKSHOP ON CERVICAL CANCER**

- The role of neoadjuvant chemotherapy followed by radical surgery in the treatment of locally advanced cervical cancer** 467  
 P. L. Benedetti-Panici, M. A. Zullo, L. Muzii, N. Manci, F. Bellati, F. Plotti, S. Basile, R. Angioli - *Rome, ITALY*  
 In 1984 the first pilot study on neoadjuvant chemotherapy in cervical cancer was reported. Since then, many investigators have studied the possible role that this therapeutic strategy could achieve in these patients. Now the EORTC group has launched a trial with the objective of comparing neoadjuvant chemotherapy followed by radical surgery versus concomitant chemoradiotherapy.
- Options for laparoscopic surgery in cervical carcinomas** 471  
 M. Possover - *Cologne, GERMANY*  
 The laparoscopic surgical options for lymphadenectomy and radical vaginal hysterectomy and for staging of cervical cancer are evaluated.
- Palliative cytostatic treatment of cervical carcinoma** 473  
 E. Petru, Ch. Benedicic, A. Seewann, H. Pickel - *Graz, AUSTRIA*  
 Palliative cytostatic therapy with single agents has moderate activity in cervical cancer. Cisplatin-based combinations are more active but also more toxic.
- Current state-of-the-art of concomitant chemoradiation in cervical carcinomas** 475  
 E. Vrdoljak, W. Hamm - *Frankfurt, GERMANY*  
 There is body of evidence that concomitant chemoradiotherapy is the new golden standard in the treatment of locally advanced cervical carcinoma.

**ORIGINAL ARTICLES**

- Filgrastim support during combination chemotherapy using cisplatin, doxorubicin, and cyclophosphamide to treat advanced or recurrent endometrial cancer: A clinical study and literature review** 481  
 D. J. Hall, D. A. Martin, K. Kincaid - *Tennessee (USA)*  
 A clinical study from a private gynecologic oncology practice is presented using filgrastim with multi-agent chemotherapy for advanced or recurrent endometrial cancer.
- Lower urinary tract function after postoperative radiotherapy in the treatment of cervical cancer** 490  
 M. Pisarska, S. Sajdak - *Poznań, POLAND*  
 Voiding disorders after combined radiotherapy and surgery are frequent and mainly apply to the detrusor muscle with the domination of functional disturbances. Urinary incontinence and other iatrogenic urogynecological symptoms restrict patient activity, the quality of life, and are the cause of patient discomfort.
- Improved early detection of cervical intraepithelial lesions by combination of conventional Pap smear and speculscopy** 495  
 B. K-J Yu, B. I-T Kuo, M-S Yen, N-F Twu, C-R Lai, P-J Chen, P-S Chien, K-C Chao, C-C Yuan - *Taiwan, ROC*  
 In the area of high incidence and low screening rates of cervical cancer, speculscopy improves the sensitivity and false negatives of a Pap smear.
- Glycoprotein CD44 expression in normal, hyperplasic and neoplastic endometrium. An immunohistochemical study including correlations with p53, steroid receptor status and proliferative indices (PCNA, MIB1)** 500  
 N. Zagorianakou, E. Ioachim, A. Mitselou, E. Kitsou, P. Zagorianakou, S. Stefanaki, G. Makrydimas, N. J. Agnantis - *Ioannina, GREECE*  
 Decreased CD44 expression in carcinomas compared with hyperplasias and normal endometrium suggests its implication in the progression of these lesions.

<b>Leiomyosarcoma of the broad ligament arising in a pre-existing pure neurilemmoma-like leiomyoma</b>	505
G. Kir, S. Eren, I. Akoz, M. Kir - <i>Istanbul, TURKEY</i>	
The first reported case of leiomyosarcoma of the broad ligament arising in a pre-existing pure neurilemmoma-like leiomyoma.	
<b>Hormonal replacement therapy and evaluation of intrauterine pathology in postmenopausal women: a ten-year study</b>	507
B. Mossa, F. Imperato, R. Marziani, F. Perniola, J. Melluso, G. Perniola - <i>Rome, ITALY</i>	
No difference in the incidence of endometrial adenocarcinoma was reported between the HRT and the non HRT groups. In postmenopausal women using HRT a higher incidence of signs (AUB, endometrial thickness $\geq 5$ mm) does not coincide with a higher incidence of malignant pathology.	
<b>The clinical outcome of patients with Stage Ia and Ia squamous cell carcinoma of the uterine cervix: A Cooperation Task Force (CTF) study</b>	513
A. Gadducci, E. Sartori, T. Maggino, F. Landoni, P. Zola, S. Cosio, B. Pasinetti, C. Alessi, A. Maneo, A. Ferrero - <i>Milan, ITALY</i>	
Conization can represent the definite treatment for FIGO Stage Ia squamous cell cervical cancer if cone margins and apex are disease-free.	
<b>Prediction of cervical infiltration in Stage II endometrial cancer by different preoperative evaluation techniques</b>	517
I. Pete, M. Górdény, E. Tóth, J. Radó, B. Pete, T. Pulay - <i>Rome, ITALY</i>	
The preoperative selection of the patients with stage II endometrial cancer are mostly based on D&C. In the future proper selection of imaging modalities can improve the preoperative staging of this gynaecological disorder and preclude unnecessary procedures. Prediction of cervical invasion in patients with endometrial cancer can rely on MRI first of all.	
<b>Malignant vulvar melanoma: Colposcopic evaluation and review of the literature. A case report</b>	523
L. Di Stefano, G. Calvisi, G. Coppola, F. Patacchiola, C. Di Berardino, G. Mascaretti - <i>L'Aquila, ITALY</i>	
A case report of vulvar melanoma seen at the Department of Obstetrics and Gynaecology of the University of L'Aquila is reported.	
<b>Assessment of breast lesions using Doppler with contrast agents</b>	527
A. M. Martínez, C. J. Medina, J. Á. G. Hernández - <i>Las Palmas de Gran Canaria, SPAIN</i>	
The use of colour Doppler ultrasound contrast agents to improve the differential diagnosis of benign and malignant breast lesions is proposed.	
<b>Image analysis (DNA ploidy) and expression of c-erb B-2 and p53 in imprint smears of breast cancer</b>	531
D. Malle, E., Patakiouta, A. Bousoulegas, P. Karakitsos, C. Destouni - <i>Athens, GREECE</i>	
The quantitative DNA analysis and expression of c-erb B-2 and p53 oncoproteins reflect the biologic behavior of breast cancer.	
<b>The triage of squamous cell abnormalities of cervical cytology by human papilloma virus screening</b>	535
A. A. Ozsaran, Y. Dikmen, F. Akercan, O. Zekioglu, M. C. Terek, L. Mgoyi, I. Altuglu - <i>Izmir, TURKEY</i>	
The triage of squamous cell abnormalities by HPV screening is presented.	
<b>Idiopathic thrombocytopenic purpura and ovarian cancer</b>	539
A. Chehal, A. Taher, M. Seoud, A. Shamseddine - <i>Beirut, LEBANON</i>	
A case of a 47-year-old woman who was diagnosed with Stage IIB ovarian endometrioid adenocarcinoma and ITP at presentation is reported.	
<b>Factors affecting outcome after incomplete excision of cervical intraepithelial neoplasia</b>	541
E. Paraskevaïdis, S. N. Kalantaridou, M. Paschopoulos, K. Zikopoulos, E. Diakomanolis, N. Dalkalitsis, G. Makrydimas, L. Pappa, V. Malamou-Mitsi, N. J. Agnantis - <i>Athens and Ioannina, GREECE</i>	
Increased age is a risk factor for recurrence in women with incomplete excision of CIN after LLETZ	
<b>Immunohistochemical expression of glucose transporter Glut1 and cyclin D1 in breast carcinomas with negative lymph nodes</b>	544
P. Ravazoula, A. Batistatou, C. Aletra, J. Ladopoulos, G. Kourounis, B. Tzigounis - <i>Rion, GREECE</i>	
All malignant cells appear to have increased needs for glucose <i>in vitro</i> as well as <i>in vivo</i> . The enhanced glucose uptake is mediated through transporters, whose action and expression are regulated by oncogenes and growth factors.	
<b>Proliferative breast disease: epidemiologic aspects, and cytologic diagnosis</b>	547
P. Anastasiadis, K. Romanidis, A. Polychronidis, N. Koutlaki, D. Tamiolakis, K. Simopoulos - <i>Alexandroupolis, GREECE</i>	
Intraoperative imprint cytology might contribute to the diagnosis of proliferative breast lesions.	
<b>Computed tomography findings of primary serous papillary carcinoma of the peritoneum in women</b>	552
M. Kebapci, O. T. Yalcin, E. Dündar, S. S. Ozalp, T. Kaya - <i>Eskisehir, TURKEY</i>	
CT features of diffuse peritoneal, omental and mesenteric involvement in the absence of an identifiable primary site should suggest the possibility of primary serous papillary carcinoma of the peritoneum.	

<b>Management of advanced-stage primary carcinoma of the fallopian tube: case report and literature review</b>	557
E. Kuscu, M. Oktem, A. Haberal, S. Erkanli, B. Bilezikci, B. Demirhan - <i>Ankara, TURKEY</i>	
A 55-year-old, gravida 7, para 3 woman with a heterogeneous left adnexal mass detected on ultrasound underwent surgery. The definitive histopathological diagnosis was primary serous adenocarcinoma of the fallopian tube with six of 25 lymph node biopsies showing metastasis. Six cycles of paclitaxel-plus-cisplatin combination chemotherapy were administered with 3-week intervals between cycles. After this was completed, a second-look laparotomy revealed no evidence of disease.	
<b>CASE REPORTS</b>	
<b>Vertebral tuberculosis presenting with elevated CA-125 and weight loss mimicking ovarian malignancy; case report</b>	561
G. Kilic, J. Blankstein, R. Kadanoff - <i>Chicago, IL (USA)</i>	
Extra-ovarian cause of elevated CA-125 secondary to vertebral tuberculosis.	
<b>Cerebral metastasis from ovarian cancer treated with a multidisciplinary approach. Case report and review of literature</b>	563
G. Porzio, G. Ronzino, E. Farina, A. Aielli, C. Ficorella, P. Marchetti - <i>L'Aquila, ITALY</i>	
A case of brain metastases from ovarian cancer treated with a multidisciplinary approach is presented.	
<b>Large endometrial polyp with sarcomatous stromal components following long-term tamoxifen treatment for breast cancer: a case report and review of the literature</b>	565
M. Varras, Ch. Akrivis - <i>Epirus, GREECE</i>	
In this report we present the clinical and pathological findings in a 73-year-old patient who developed a large uterine polyp with sarcomatous stromal elements and benign endometrial epithelium, following low dose tamoxifen therapy after four years.	
<b>Malignant ovarian germ cell tumors: Analysis of 32 cases</b>	569
F. Yilmaz, T. Gül, A. K. Uzunlar - <i>Diyarbakir, TURKEY</i>	
Some clinicopathologic characteristics and the outcome of patients with malignant ovarian germ cell tumors (MOGCT) were evaluated. The clinical charts and pathologic reports of 32 patients with ... This study provides additional data in confirmation of previous reports that management of MOGCT with fertility preservation is safe.	
<b>Primary carcinoid tumor of the ovary: A case report</b>	574
E. Kuscu, D. Eroglu, B. H. Ozdemir, S. Secme, A. Haberal - <i>Ankara, TURKEY</i>	
Primary ovarian carcinoid tumors are rare. This report describes the clinicopathologic and immunohistochemical features of a primary ovarian carcinoid that contained a mature cystic teratoma.	
<b>Breast cancer metastatic to the vulva after local recurrence occurring on a rectus abdominis myocutaneous flap: A case report and review of the literature</b>	577
M. Valenzano Menada, A. Papadia, P. Lorenzi, E. Fulcheri, N. Ragni - <i>Genoa, ITALY</i>	
Unusual breast cancer metastases are described which differs from the preceding cases because the patient underwent plastic surgery with reconstruction of the breast with a rectus abdominis myocutaneous flap one year after mastectomy and developed a local recurrence three years thereafter.	
<b>Laparoscopically assisted vaginal hysterectomy with bilateral salpingo-oophorectomy due to endometrial cancer in a heart transplant recipient. A case report</b>	580
K. Szylo, U. Bartodziej, B. Wlodarczyk, Z. Dobrowolski, H. Romanowicz-Makowska - <i>Lódź, POLAND</i>	
<b>Ovarian cyst as a pelvic mass in an infant</b>	582
Ch. Tsobanidou, G. Dermitzakis - <i>Thessaloniki, GREECE</i>	
An autoamputation ovarian cyst was detected in an infant which cyst failed to resolved and surgical removal was performed.
